

Dear Gemini Families,

I am excited to be joining the Gemini family as a new Jetstar! I have many years of service to Brevard's wonderful students and have loved every day of every year. I still awake each morning with my first thought being, "I can't wait to get to school!" The students of Brevard County are our #1 priority and our best future resource. Everything we do is based on our ability to nurture and build relationships with students, parents, teachers, staff and our community.

I am a product of the Brevard County school system and a member of one of the first graduating classes of PBHS. I went on to graduate from Rollins College with a degree in Elementary Education and a few years later earned a Master of Science from FIT. My Educational Leadership degree was obtained in 2009 from Nova Southeastern. I have a strong technology background and have supported the K-12 environment in several Brevard County schools throughout my career. I believe the use of technology can enhance education and motivate students to learn and create solutions collaboratively, which is necessary for today's workforce. I am excited to learn how I may support Gemini with new technology.

I have always found that new opportunities lead to greater learning and challenges lead to personal growth. I am inspired by the success of others and I will strive to learn the needs of an already successful Gemini school culture. My door is always open to teachers, parents and students and I look forward to meeting all of you very soon!

Sincerely,

Carol Burns
